

Bruynzeel Office

Space for inspiration

 **bruynzeel** storage systems

FOCUS ON CUSTOMER SATISFACTION

“The added benefit is
that it inspires!”

Office reference

In this new office, personal as well as shared working areas are integrated into its design. With the help of modern IT, a flexible work space has been created. Bruynzeel's mobile cabinets provide ample storage capacity. To add a splash of colour to the interior, an image of Leaves was applied to the end panels.

A pleasant work place is an efficient work place

Your office is more than just a place to work in. It is a dynamic environment, which, despite the limited amount of space, should inspire as well as provide the peace and quiet you need to concentrate on the job at hand. An attractive environment, where you can move around comfortably, knowing that each piece of information can be retrieved easily and conveniently. An environment where office cabinets are an important aspect.

Get the most out of your organisation

The New World of Work

In a traditional office landscape, approximately thirty per cent of the workstations are unoccupied because, for example, employees are travelling or working from home. Increased staff mobility and a reduction in floor space are important reasons for organisations to make the transition to innovative office concepts, also known as the New World of Work.

Optimise your storage

Office innovation and the New World of Work necessitate a radical rethink of office storage solutions. Offices without fixed workstations require a central storage location for files, dossiers and personal effects. Storage systems that allow easy access to all documents and reference materials, without interrupting or distracting others.

Make the most of your extra space

How would you utilise that fifty per cent of extra space?

The New World of Work demands flexible workplaces: quiet zones that avoid external noise and allow users to concentrate and work in peace, brainstorm or conduct meetings. And comfortable, relaxing lounge areas where you can share your ideas with customers or colleagues.

Optimise your space!

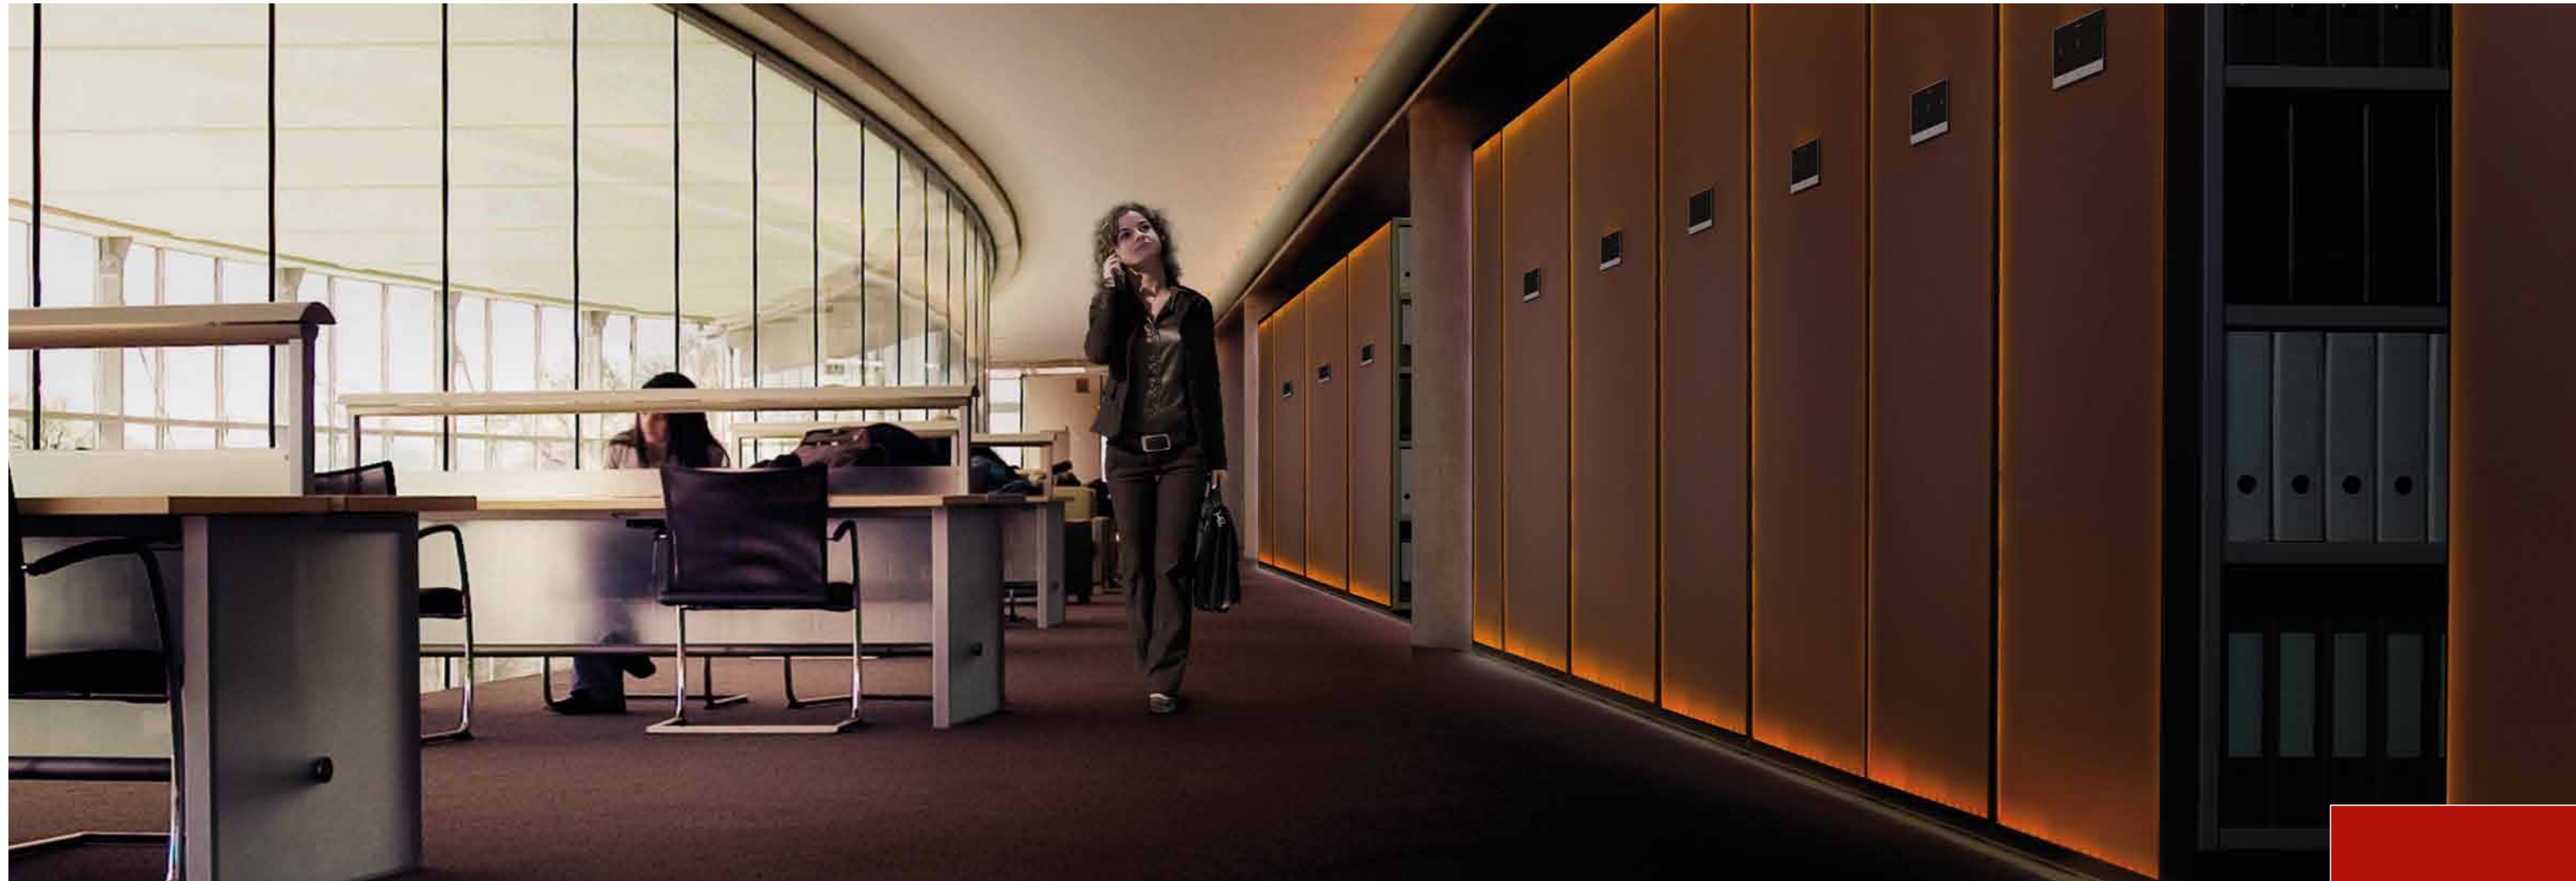

Whereas traditional storage solutions eat up valuable square footage, Bruynzeel offers a unique mobile storage concept: mobile office cabinets. With this system, only one access aisle is needed, doubling your storage capacity. Simply open the aisle where access is required, and move the mobile units either singly or together. Multifunctional in use and design. Make the most of your space!

Bespoke design

A pleasant working environment

An important issue that is often overlooked: workplaces that are pleasing to the eye create a pleasant atmosphere and improve staff morale and performance. By choosing Bruynzeel, you not only gain fifty per cent extra space, but also a positive work environment.

An agreeable atmosphere

The colour complements the house style and the interior. The systems are transformed into a design feature. Bruynzeel supplies systems with steel, glass or laminated design panels. Have your logo integrated in a wall unit, or imprint a unique image that reflects your activities. All of this is possible. LED lighting in changing colours is another option. The systems can also enhance the acoustics in the room. For example, perforated End Panels with acoustic noise-reducing features are ideal for offices where a lot of people come and go and where a lot of phone calls are made. The possibilities are virtually endless, and that provides ample scope for interesting ideas.

Compactus® Dynamic: comfort

Compactus® Dynamic: focus on comfort

Use the Compactus® Dynamic system to create extra storage space or more work stations. Thanks to the user-friendly, ergonomic, electronic operation, the system is easy to use and effortlessly moved. Just a light touch on the panel gives immediate access to the spacious interior of the Compactus® Dynamic. Even with your hands full - no problem. Operation is effortless.

Compactus® Dynamic: focus on safety

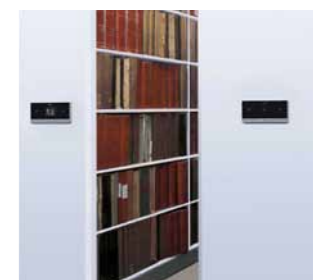

The Motor Current Monitoring System (MCMS) safeguards the safety of users. This feature ensures that the mobiles stop immediately if another user tries to move the system while a person is in the aisle.

Compactus® Dynamic Pro: comfort+

Compactus® Dynamic Pro: focus on extra ease of use and secure storage

Compactus® Dynamic Pro offers all the advantages of Compactus® Dynamic and more. The intelligent electronic control of the Compactus® Dynamic Pro offers enhanced ease of use and the possibility of securely storing confidential information. By PIN code or Access tags, different aisles can be assigned to specific users or departments. The operating functions are self explanatory and require no specific training. Vibration-free movement, thanks to 'soft start' and 'soft stop' features, ensures that all documents remain safely in place. If our daily lives are made easier by using electronics, why settle for anything less at work?

Enjoy the benefits of Compactus® Original

Compactus® Original: focus on secured storage

A central locking system and sliding doors guarantee secure storage of confidential information and prevent unauthorised access.

How original do you want to be?

The invention of this central storage system has its origin in Switzerland.

In the spring of 1947, Hans Ingold, engineer, applied for a patent for his invention: a hand-wheel operated mobile and space-saving archive and storage system.

The Compactus® storage system was born. Over the years, lighter versions of these systems were brought to market, designed for the office environment.

They are becoming increasingly sleek, stylish, and deluxe.

Compactus® Original: focus on extra space

Use the Compactus® Original system to create additional storage space or more work stations. Double-sided access makes the system highly accessible, which is ideal for shared storage and use in open offices. Use the lower version to increase a sense of openness. The hand wheel ensures ease of operation. The system's user friendliness is further enhanced by a convenient trolley ramp.

Sysco®: flexible and multifunctional

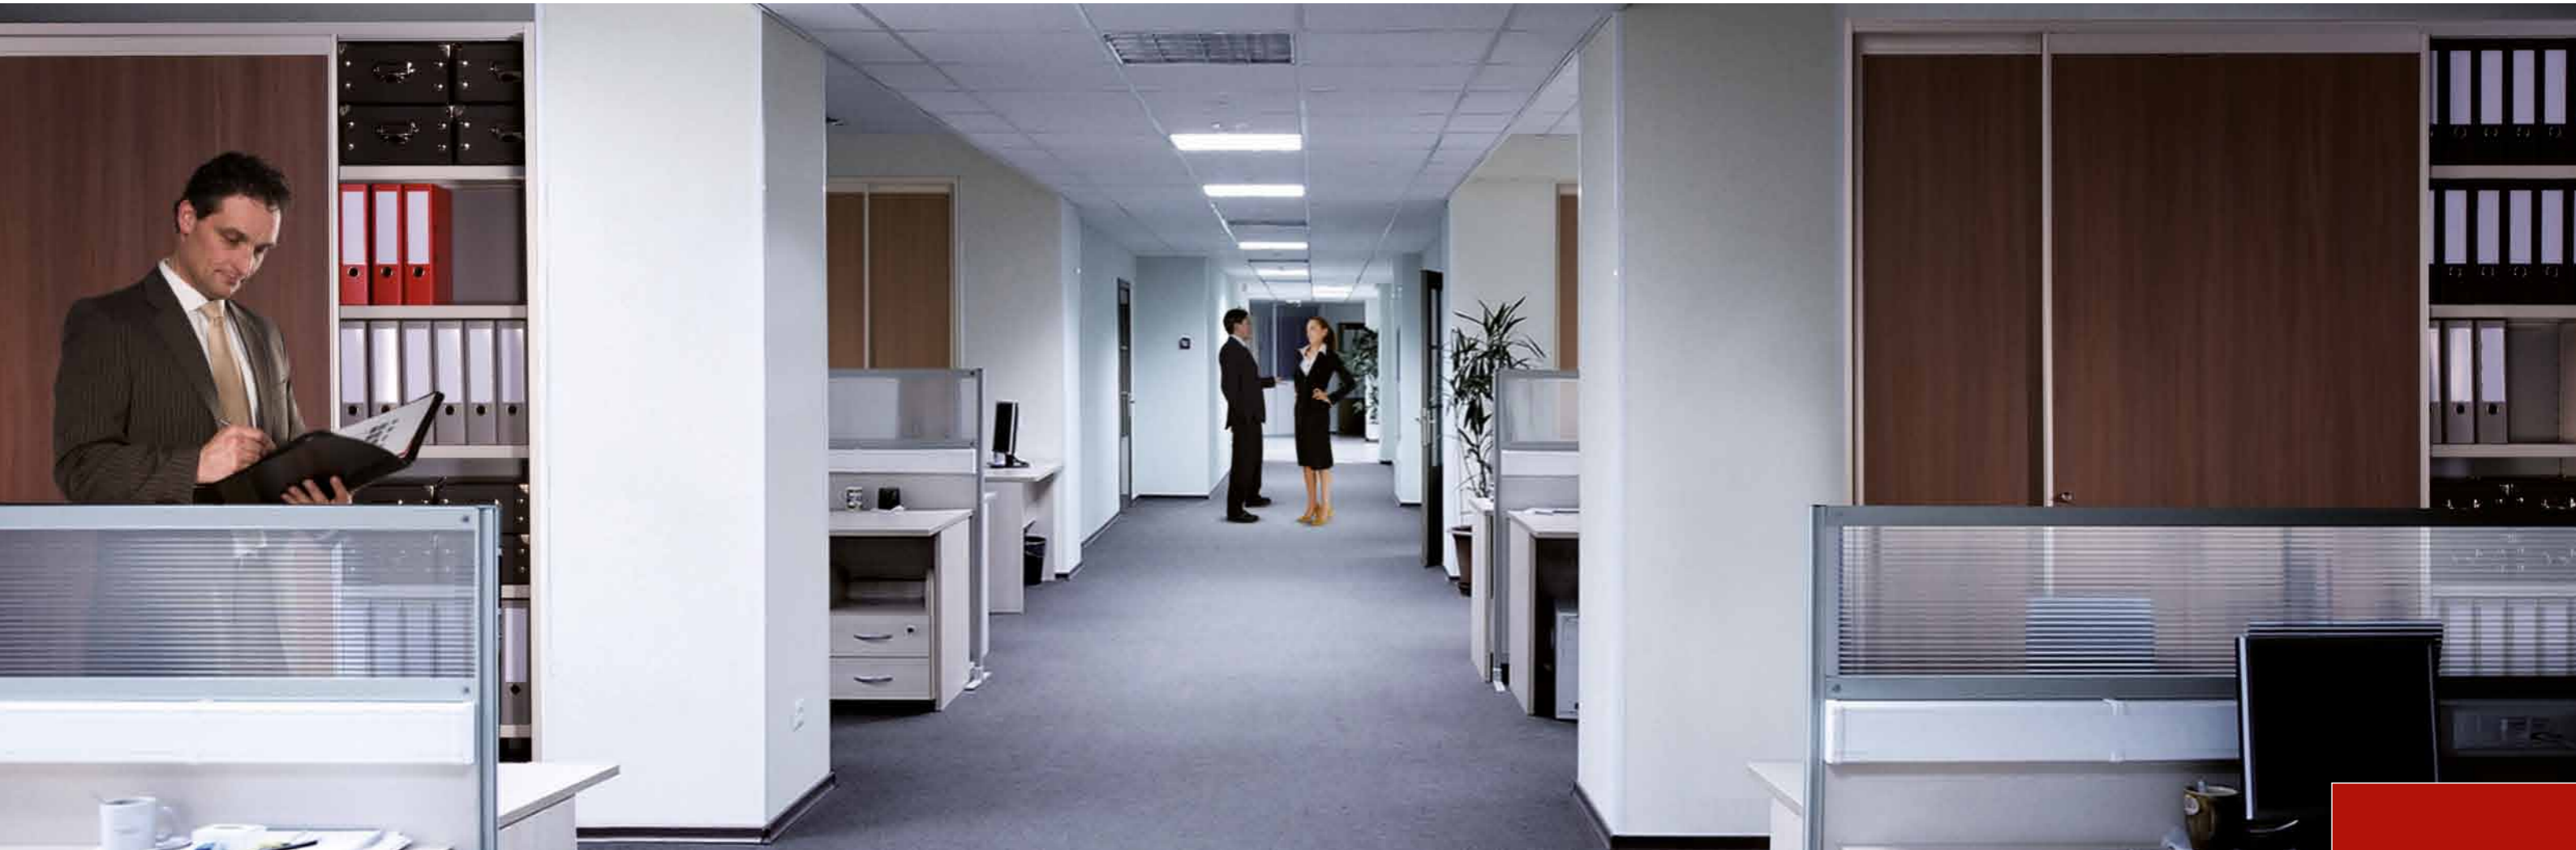

Sysco®: focus on flexibility

The versatile Sysco® system, available in various depths and heights, fits any office space. Thanks to its versatility, it is easily adapted to suit changing office needs. The stylish system is available as an open or closed system. Colours are applied using a powder coating, guaranteeing one hundred percent coverage.

Sysco® accessories: focus on multifunctionality

Clever multifunctional accessories increase the system's applicability. Whichever archive system you use, Sysco® can be adapted to meet your every wish and requirement.

Multi-file: focus on flexible filing

A fine example is Multi-file, which is a multifunctional suspended file, suitable for both under-shelf filing and filing in pull-out frames. Bruynzeel Multi-file offers a 3-in-1 function, with a V base, a 15-mm base and a 30-mm base all in one. The file is never any wider than its contents, saving space all round.

The power of Partnership

Focus on partnership

We would be delighted to help you create smart, space-saving solutions for your organisation. Designing eye-catching storage systems requires close consultation and is the key to devising a tailored solution that matches your needs. Because we have our own Research and Development department and an experienced team, we are able to adapt our products to your requirements and market trends. You spur us on to continue developing better and more creative solutions.

Focus on quality and sustainability

Choosing Bruynzeel means quality and sustainability are guaranteed. Our products meet all the important international quality standards awarded by independent experts. Bruynzeel is a market leader when it comes to sustainability. Our factory in the Netherlands has been awarded ISO 9001 and ISO 14001 certification. ISO 14001 certification shows that we comply with environmental legislation and regulations and that we constantly endeavour to reduce our environmental impact.

This means that sustainability not only forms part of our day-to-day business, but also relates to our products themselves. We would be delighted to assist you in achieving your sustainability goals by offering you durable products and space-saving concepts. We also hope to contribute towards creating a pleasant work environment by offering flexible design solutions.
